Nuclear Fusion Articles Arising from Papers Presented at the 29th IAEA Fusion Energy Conference (London, UK, 16–21 October 2023)

For articles with more than one author, only the first author's name is given.

Vol. 63, No. 11 (November 2023), pp 110201–112015

J. Hobirk: The JET hybrid scenario in Deuterium, Tritium and Deuterium-Tritium 112001

M. Maslov: JET D-T scenario with optimized non-thermal fusion 112002

H.-T. Kim: Validation of D–T fusion power prediction capability against 2021 JET D–T experiments 112004

D.B. King: Tritium neutral beam injection on JET: calibration and plasma measurements of stored energy 112005

S.E. Sharapov: Experiments on excitation of Alfvén eigenmodes by alpha-particles with bump-on-tail distribution in JET DTE2 plasmas 112007

E.R. Solano: L–H transition studies in tritium and deuterium–tritium campaigns at JET with Be wall and W divertor . . 112011

T. Tala: Isotope mass scaling and transport comparison between JET deuterium and tritium L-mode plasmas 112012

M. Faitsch: Divertor power load investigations with deuterium and tritium in type-I ELMy H-mode plasmas in JET with the ITER-like wall 112013

M.J. Mantsinen: Experiments in high-performance JET plasmas in preparation of second harmonic ICRF heating of tritium in ITER 112015

Vol. 63, No. 12 (December 2023), pp 124001–129501

Ž. Štancar: Overview of interpretive modelling of fusion performance in JET DTE2 discharges with TRANSP 126058

Vol. 64, No. 1 (January 2024), pp 010201–019801

J. Horacek: Scaling of HeatLMD-simulated impurity outflux from COMPASS-U liquid metal divertor 016014

Vol. 64, No. 3 (March 2024), pp 034001–037001

J. Gaspar: Calorimetry measurement for energy balance and energy distribution in WEST for L-mode plasmas 036018

T.E. Gebhart: Impact of breech geometry and propellant flow on the release of large pellets for the ITER disruption mitigation system 036021

Vol. 64, No. 5 (May 2024), pp 054001–056042

L. Reali: Finite element models for radiation effects in nuclear fusion applications 056001

A. Kallenbach: Divertor enrichment of recycling impurity species (He, N_2, Ne, Ar, Kr) in ASDEX Upgrade H-modes 056003

I.E. Garkusha: Influence of AR injection on shielding layer properties and surface protection from transient high heat loads under the QSPA plasma exposures . . . 056010
O. Kudlacek: Overview of advances in ASDEX Upgrade plasma control to support critical physics research for ITER and beyond . . . 056012
V. Gopakumar: Plasma surrogate modelling using Fourier neural operators . . . 056025
I. Fernández-Berceruelo: Progress in design and experimental activities for the development of an advanced breeding blanket . . . 056029
M.A. Van Zeeland: Isotope impact on Alfvén eigenmodes and fast ion transport in DIII-D . . . 056033
J. Huang: Transport and stability in sustained high q_{min}, high β_{N} discharges on DIII-D . . . 056034
M.S. Islam: Analysis and design of fast flow liquid Li divertor for fusion nuclear science facility (FNSF) using coupled plasma boundary and LM MHD/heat transfer codes . . . 056036
C.S. Chang: Role of turbulent separatrix tangle in the improvement of the integrated pedestal and heat exhaust issue for stationary-operation tokamak fusion reactors . . . 056041

Vol. 64, No. 6 (June 2024), pp 064001–068002

V.A. Izzo: Boundary condition effects on runaway electron mitigation coil modeling for the SPARC and DIII-D tokamaks . . . 066003
T. Akagi: Achievement of high-current continuous-wave deuteron injector for linear IFMIF prototype accelerator (LI-PAc) . . . 066005
S.S. Henderson: Comparison of reduced model predictions for divertor detachment onset and reattachment timescales in ASDEX Upgrade and JET experiments . . . 066006
A. Ishizawa: Plasma beta dependence of turbulent transport suggesting an advantage of weak magnetic shear from local and global gyrokinetic simulations . . . 066008
K. Yanagihara: Broadening of electron cyclotron power deposition and driven current profiles caused by dissipative diffractive propagation . . . 066009
T. Hemmi: Lessons learned from European and Japanese production of ITER toroidal field coils . . . 066010
T. Long: The role of shear flow collapse and enhanced turbulence spreading in edge cooling approaching the density limit . . . 066011
D. Kim: Investigation of fast ion effects on core turbulence in FIRE mode plasmas . . . 066013
K.C. Shaing: Wave–particle interactions in tokamaks . . . 066014
A. Wingen: Prediction of pellet mass thresholds for ELM triggering in low-collisionality, ITER-like discharges . . . 066015
I.A.M. Datta: Whole device modeling of the fuze sheared-flow-stabilized Z pinch . . . 066016
K.J. McCarthy: Multi-pellet injection into the NBI-heated phase of TJ-II plasmas . . . 066019
Y.-H. Lee: Destabilization of geodesic acoustic-like mode in the presence of poloidally inhomogeneous heat sources in tokamak plasmas . . . 066021
M. Fukumoto: Hydrogen removal by electron cyclotron wall conditioning with neon gas and its impact of tokamak plasma start-up on the QUEST spherical tokamak . . . 066022
F. Kin: Observation of avalanche-like transport in Heliotron J and JT-60 U plasmas . . . 066023
G. Wang: Core electron temperature turbulence and transport during sawtooth oscillations in the DIII-D tokamak . . . 066024
M.I. Kobayashi: Simultaneous measurements for fast neutron flux and tritium production rate using pulse shape discrimination and single crystal CVD diamond detector . . . 066026
D. Moseev: Influence of sawtooth oscillations on fast ions in a stellarator . . . 066028
L. Piron: Error field detection and correction studies towards ITER operation . . . 066029
V. Zamkovska: DECAF cross-device characterization of tokamak disruptions indicated by abnormalities in plasma vertical position and current . . . 066030
Z. Cheng: Effects of plasma nonuniformity on toroidal Alfvén eigenmode nonlinear decay . . . 066031
J. Rueda-Rueda: Measurement of toroidal Alfvén eigenmode-driven fast-ion flows using an imaging neutral particle analyser at ASDEX Upgrade . . . 066032

K. Lu: Correction coil and magnet feeder lessons learned 066033
P. Jacquet: ICRH operations during the JET tritium and DTE2 campaigns 066039

Vol. 64, No. 7 (July 2024), pp 074001–079501

D. Terranova: RFX-mod2 as a flexible device for reversed-field-pinch and low-field tokamak research 076003
D.P. Schissel: Remote operation of the DIII-D National Fusion Facility 076004
P. Liu: Cross-scale interaction between microturbulence and meso-scale reversed shear Alfvén eigenmodes in DIII-D plasmas 076007
K. Ogawa: Observation of energetic ion anisotropy using neutron diagnostics in the Large Helical Device 076010
M. Valovič: Fuelling of deuterium–tritium plasma by peripheral pellets in JET experiments 076013
S. Sugiyama: Development of pulsed plasma operation scenario and required conditions in JA DEMO 076014
H Wang: Nonlinear excitation of energetic particle driven geodesic acoustic mode by Alfvén instability in ASDEX-Upgrade Tokamak 076015
Y. Zhang: Neoclassical tearing mode stabilization by electron cyclotron current drive in EAST tokamak experiments 076016
M. Sato: Kinetic-magnetohydrodynamic hybrid simulation of infernal modes in circular tokamak plasmas with effects of kinetic thermal ions 076021
J. Gonzalez-Martin: Active control of Alfvén eigenmodes by external magnetic perturbations with different spatial spectra 076022
T. Rafiq: Predictive modeling of NSTX discharges with the updated multi-mode anomalous transport module 076024
S. Saarelma: Density pedestal prediction model for tokamak plasmas 076025
M. Zanini: Automated W7-X sawtooth crashes detection and characterization 076027
M. Komm: COMPASS Upgrade: a high-field tokamak for ITER- and DEMO-relevant research 076028
L. Carraro: RFX-mod2 diagnostic capability enhancements for the exploration of multi-magnetic-configurations 076032
H. Frerichs: Heuristic predictions of RMP configurations for ELM suppression in ITER burning plasmas and their impact on divertor performance 076035
A.C.C. Sips: Power and isotope effects in the ITER baseline scenario with tungsten and tungsten-equivalent radiators in DIII-D 076037
M.T. Beidler: Wall heating by subcritical energetic electrons generated by the runaway electron avalanche source 076038
T. Lyytinen: Proof-of-principle of parametric stellarator neutronics modeling using Serpent2 076042
P. Arena: W-HYDRA: a new experimental platform for the water-cooled lead lithium breeding blanket 076043
Y.J. Liu: Experimental and simulation analysis of weakly coherent modes in I-mode discharges on EAST 076045
N. den Harder: Beam optics of RF ion sources in view of ITER's NBI systems 076046
D. Moulton: Super-X and conventional divertor configurations in MAST-U ohmic L-mode; a comparison facilitated by interpretative modelling 076049
D. Carloni: Use of the OSCAR-Fusion V1.4.a code for a preliminary assessment of the ACP contamination within the main ITER water cooling circuit 076050
K. Schmid: Implications of T loss in first wall armor and structural materials on T-self-sufficiency in future burning fusion devices 076056
A. Chomiczewska: ICRH-related impurity source and control across experiments in H, D, T plasmas at JET-ILW 076058
T. Kobayashi: New type of self-sustained divertor oscillation driven by magnetic island dynamics in Large Helical Device 076059
Y. G., Joachim Geiger: Heat and particle exhaust in high-performance plasmas in Wendelstein 7-X 076060
N.N. Gorelenkov: Fast ion relaxation in ITER mediated by Alfvén instabilities 076061
N. Shi: Prediction of transport in the JET DTE2 discharges with TGLF and NEO models using the TGYRO transport code 076062
Y. F. He: T_i/T_e effects on transport in EAST low q_{95} plasmas 076064

Vol. 64, No. 8 (August 2024), pp 084001–089502

L.N. Westwood: Fusion decommissioning and regulation (UK-STEP perspectives) . . . 085001
G.M. Staebler: Successful prediction of tokamak transport in the L-mode regime . . . 085002
P. Mantica: Detection of alpha heating in JET-ILW DT plasmas by a study of the electron temperature response to ICRH modulation . . . 086001
C. Castaldo: Stability analysis of plasma waves driven by runaway electrons in tokamak hot plasmas . . . 086003
W. Zhang: First observation of edge impurity behavior with $n = 1$ RMP application in EAST L-mode plasma . . . 086004
D. Hu: Plasmoid drift and first wall heat deposition during ITER H-mode dual-SPIs in JOREK simulations . . . 086005
K. Imadera: Turbulent particle pinch in gyrokinetic flux-driven ITG/TEM turbulence . . . 086006
V. Graber: Divertor-safe nonlinear burn control based on a SOLPS parameterized core-edge model for ITER . . . 086007
F. Turco: Radiation induced non-linear oscillations in ITER baseline scenario plasmas in DIII-D . . . 086008
G.K. Holt: Tokamak divertor plasma emulation with machine learning . . . 086009

H. Kajitani: Completion of all the ITER toroidal field coil structures . . . 096026
J. Wu: Counteracting sawtooth crash effects via fluctuation-induced inward transport in HL-2 A NBI plasma . . . 096031
K. Agatsuma: Horizontal homing laser for high repetitive inertial fusion . . . 096035
M. Lennholm: Plasma control for the step prototype power plant . . . 096036
P.J. Bonofiglo: Alpha particle loss measurements and analysis in JET DT plasmas . . . 096038

Vol. 64, No. 10 (October 2024), pp 103001–108003

Y. Shin: Temperature-dependent electron–phonon coupling changes the damage cascades in neutron-irradiation molecular dynamics simulation in W . . . 106001
M. Richou: Evolution of pre-damaged ITER grade plasma facing components under WEST plasma exposure: smoothing and tungsten sources . . . 106002
A. Bruschi: Conceptual design of a modular EC heating system for EU-DEMO . . . 106003
J. Guo: Simulation study of the influence of drifts on the upstream and target heat flux width under different B_T directions . . . 106004
A.K. Singh: Magnetic shaping effects on turbulence in ADITYA-U tokamak . . . 106005
R.T. Osawa: Assessment of the impact of fuelling puff location on divertor impurity compression and enrichment in STEP . . . 106007

H. Tanabe: Ion heating/transport characteristics of the merging startup plasma scenario in the TS-6 spherical tokamak . . . 106008
I. Borodkina: Modeling of plasma facing component erosion, impurity migration, dust transport and melting processes at JET-ILW . . . 106009
T. Oishi: Observation of tungsten emission spectra up to W^{46+} ions in the Large Helical Device and contribution to the study of high-Z impurity transport in fusion plasmas . . . 106011
The JET Operations Team: JET machine operations in T&D-T . . . 106014
M. Nakajima: Status and issues of high-temperature and high-pressure water corrosion research of fusion structural materials in Japanese DEMO reactor development . . . 106017
H. Nagatomo: Formation of high areal density core using an efficient and robust implosion method for fast ignition . . . 106019
T. Onchi: Electron cyclotron current start-up using a retarding electric field in the QUEST spherical tokamak . . . 106020
A. Mariani: Negative triangularity scenarios: from TCV and AUG experiments to DTT predictions . . . 106024
J. Decker: Expulsion of runaway electrons using ECRH in the TCV tokamak . . . 106027
H.R. Strauss: Resistive wall tearing mode disruptions . . . 106037
N. Chaudhary: Electron transport barrier and high confinement in configurations with internal islands close to the plasma edge of W7-X . . . 106038
H. Yang: Numerical study of a general criterion for divertor detachment control . . . 106039
F. Crisanti: Physics basis for the divertor tokamak test facility . . . 106040
A.S. Moore: Diagnosing inertial confinement fusion ignition . . . 106041
D. Matveev: An integral approach to plasma-wall interaction modelling for EU-DEMO . . . 106043
I. Jepu: Overview of damage to beryllium limiters by unmitigated disruptions and runaway electrons in the JET tokamak with metal walls . . . 106047
K.A. Jadeja: Plasma performance enhancement and impurity control using a novel technique of argon–hydrogen mixture fueled glow discharge wall conditioning in the ADITYA-U tokamak . . . 106048
A. Fil: Disruption runaway electron generation and mitigation in the Spherical Tokamak for Energy Production (STEP) . . . 106049
X. Garbet: The effect of shaping on trapped electron mode stability: an analytical model . . . 106055
L.W. Packer: ITER materials irradiation within the D–T neutron environment at JET: post-irradiation radioactivity analysis following the DTE2 experimental campaign . . . 106059
K.J. Callahan: Understanding the L-H isotope effect at the DIII-D tokamak and advancements in synthetic turbulence diagnostics . . . 106060
C. Giroud: The core–edge integrated neon-seeded scenario in deuterium–tritium at JET . . . 106062

Vol. 64, No. 11 (November 2024), pp 112001–117003

H. Zohm: Overview of ASDEX upgrade results in view of ITER and DEMO . . . 112001
O. Grulk: Overview of the first Wendelstein 7-X long pulse campaign with fully water-cooled plasma facing components . . . 112002
C.T. Holcomb: DIII-D research to provide solutions for ITER and fusion energy . . . 112003
J.W. Berkery: NSTX-U research advancing the physics of spherical tokamaks . . . 112004
Y. Ding: Overview of the recent experimental research on the J-TEXT tokamak . . . 112005
X. Litaudon: EUROfusion contributions to ITER nuclear operation . . . 112006
S. Maeyama: Overview of multiscale turbulence studies covering ion-to-electron scales in magnetically confined fusion plasma . . . 112007
H. Shirai: Recent progress of JT-60SA project toward plasma operation . . . 112008
K. Ida: Overview of Large Helical Device experiments of basic plasma physics for solving crucial issues in reaching burning plasma conditions . . . 112009
W.-H. Ko: Overview of the KSTAR experiments toward fusion reactor . . . 112010
R.L. Tanna: Overview of physics results from the ADITYA-U tokamak and future experiments . . . 112011
C.F. Maggi: Overview of T and D–T results in JET with ITER-like wall . . . 112012

X. Gong: Overview of recent experimental results on the EAST tokamak 112013
H. Gota: Enhanced plasma performance in C-2 W advanced beam-driven field-reversed configuration experiments . . . 112014
F. Romanelli: Divertor tokamak test facility project: status of design and implementation 112015
M. Hoelzl: Non-linear MHD modelling of transients in tokamaks: a review of recent advances with the JOREK code 112016
J.R. Harrison: Overview of physics results from MAST upgrade towards core-pedestal-exhaust integration 112017
J.A. Alonso: Density profiles instellarators: an overview of particle trans port, fuelling and profile shaping studies at TJ-II 112018
E. Joffrin: Overview of the EUROfusion tokamak exploitation programme in support of ITER and DEMO 112019
S.A.M. McNamara: Overview of recent results from the ST40 compact high-field spherical tokamak 112020
X.R. Duan: Recent advance progress of HL-3 experiments 112021
J. Bucalossi: WEST full tungsten operation with an ITER grade divertor 112022
B.P. Duval: Experimental research on the TCV tokamak 112023
F. M. Poli: Summary of the theory and modeling contributions at the 29th IAEA Fusion Energy Conference (FEC 2023) 117001
K. Hesch: Progress in particular fields of fusion technology presented at the 29th IAEA Fusion Energy Conference 2023 117002
X. Litaudon: Summary of the 29th IAEA fusion energy conference under the topics magnetic fusion experiments (EX) and innovative & alternative concepts (IAC) 117003

Vol. 64, No. 12 (December 2024), pp 124001–129601

G. Gervasini: Hydrogen isotopic ratio by residual gas analysis during the JET DT campaigns 126003
L. Bardoczi: The root cause of disruptive NTMs and paths to stable operation in DIII-D ITER baseline scenario plasmas 126005
H. Saitoh: Transition from electrostatic to electromagnetic modes of low-frequency fluctuations in RT-1 126011
L. Berti: Performances of the ITER pressure suppression system during unstable steam condensation regimes 126015
C. Zhao: Simulation of DIII-D disruption with argon pellet injection and runaway electron beam 126026
F. Eriksson: Simulations of the stationary $Q = 10$ and the exit phase from the flat-top of an ITER 15 MA baseline scenario: predictive JINTRAC simulation with a consistent treatment of D and T in the whole plasma 126033
S. Mordijck: Impact of ionization and transport on pedestal density structure in DIII-D and Alcator C-Mod 126034
S. Freethy: The optimisation of the STEP electron cyclotron current drive concept 126035
G. Granucci: Roles of ECH system in DTT plasma operations 126036
B. Coppi: Non-thermal fusion burning processes, relevant collective modes and gained perspectives 126037
A. Poletaeva: First SOLPS-ITER modelling of an X-point radiator in ITER 126038
R.I. Pinsker: First high-power helicon results from DIII-D 126058
R. Ochoukov: Experimental and numerical investigation of the Doppler-shifted resonance condition for high frequency Alfvén eigenmodes on ASDEX Upgrade 126060
H.Q. Wang: Manipulating density pedestal structure to improve core–edge integration towards low collisionality 126061
S. Saito: Emission of high rovibrational hydrogen molecules under detached plasma conditions by recycling on the tungsten wall 126067
M. Xu: Summary of presentations reported in EXperiment confinement (EX-C) session at the 29th IAEA fusion energy conference 127002

Vol. 65, No. 1 (January 2025), pp 010401–019801

W.X. Wang: Plasma self-driven current in tokamaks with magnetic islands 016008
M. Rahman: Studies on the retarded recrystallization of tungsten in CIMPLE-PSI exposed under very-high target temperature and long He^+-fluence 016017
S. Zhou: First application of the island divertor configuration in the J-TEXT tokamak 016020
J.M. García-Regaña: Reduced electrostatic turbulence in the quasi-isodynamic stellarator configuration CIEMAT-QI4 016036

Y.X. Sun: Fast ion studies in the extended high-performance high β_P plasma on EAST 016040
G. Brochard: Saturation of fishbone instability through zonal flows driven by energetic particle transport in tokamak plasmas 016052
M. Houry: Protection of the plasma facing components in the WEST tokamak, progress and development in view of ITER 016059

Vol. 65, No. 2 (February 2025), pp 024001–029501

D.A. Gates: Stellarator fusion systems enabled by arrays of planar coils 026052
K.R. Gage: First fluctuation measurements using an Imaging Neutral Particle Analyzer on DIII-D 026055
