Retraction Note to: *Oncogene* https://doi.org/10.1038/s41388-019-0930-3, published online 16 August 2019

The authors have retracted this article. After publication, the authors requested a correction to remove duplicate western blot loading controls representing the same cell lines and treatments from Figs. 2C, 3A and 7C, and replace misused loading controls in Fig. 4A. However, further checks by the publisher found additional concerns:

- Fig. 1 PANC-1 PARP and AsPC-1 β-actin blots appear to originate from the same gels as Supplementary Fig. S1 YAPC PARP and β-actin (right).
- Fig. 2C AsPC-1 ATG7 blot appears highly similar to Fig. 3E (MIA PaCa-2) β-actin.
- Fig. 5C shNRF2 and shNRF+ATO TEM images appear to overlap with different magnification.
- There appear to be further β-actin overlaps between different treatments and cell lines (e.g. Fig. 4B AsPC-1, HPAF-II and YAPC, and Fig. 7A YAPC).

The authors have stated that the errors occured due to oversights in data management.

All authors agree with this retraction.
