Retraction Note: Diagnostic utility of strain and shear wave ultrasound elastography in differentiation of benign and malignant solid breast lesions

Ahmed Tohamy Ahmed[1*]

Retraction Note to: Egyptian Journal of Radiology and Nuclear Medicine (2020) 51:70
https://doi.org/10.1186/s43055-020-00181-7

The Editor-in-Chief has retracted this article. After publication, concerns were raised regarding the images presented in the figures, specifically:

- Figure 2 appears highly similar to Figure 2A of [1];
- Figure 3 appears highly similar to an example image on the GE Healtcare LOGIQ™Club Europe website titled "LOGIQ E9—SWE Breast Imaging" [2].

The Editor-in-Chief therefore no longer has confidence in the presented data.

The author has not responded to any correspondence from the editor or publisher about this retraction.

Published online: 05 February 2026
